Investment Performance

Investors should consider the investment objectives, risks, and charges and expenses of a fund carefully before investing. Prospectuses and, if available, the summary prospectuses, containing this and other information about the fund are available by contacting your financial consultant. Please read the prospectus and summary prospectus carefully before investing to make sure that the fund is appropriate for your goals and risk tolerance. The performance quoted reflects the reinvestment of dividends and capital gains and is net of expenses. It does not reflect the maximum sales charges, which are generally waived for investments within qualified plans. Such charges, if applied, would reduce the performance quoted. **The performance information shown represents past performance and is not a guarantee of future results.** The investment return and principal value of an investment will fluctuate so that the shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance information shown. For performance data current to the most recent month-end, please reference the Investment Company Contact Information section. Text in bold italics indicates extended performance which is based on the investment's oldest share class, adjusted for fees. Fi360 Fiduciary Scores calculated using extended performance are shown with a colored border.

Models - Summary

Model summary statistics are reported below. The performance quoted reflects the reinvestment of dividends and capital gains and is net of expenses. It does not reflect the maximum sales charges, which are generally waived for investments within qualified plans. Such charges, if applied, would reduce the performance quoted. **The performance information shown represents past performance and is not a guarantee of future results. The investment return and principal value of an investment will fluctuate so that the shares, when redeemed, may be worth more or less than their original cost.**

Historical model performance is calculated using the historical investments and allocations specified along with the rebalancing method that was selected. If included, the hypothetical performance (Hypo.) is for illustrative purposes only and may not reflect the actual performance or volatility that would have been experienced. It utilizes the current model allocations and does not take into account any historical investment or allocation changes. 1yr Model turnover is approximated using the following formula: the lesser of investments added during the last year and investments removed during the last year is divided by the average number of investments held over that period. Please view the Appendix for additional disclosures.

Objective:

Current Model Allocations

The current model allocation is shown below. Specific investment positions may be found in the table below.

Short-Term Fixed Income	40.0%
Intermediate Fixed Income	25.0%
Long-Term Fixed Income	25.0%
Large-Cap Equity	10.0%
Total:	100.0%

Risk Level

Using the model's 3 year standard deviation, the gauge below reflects, on a relative scale, the risk associated with this model.

Current Model Performance as of 12/31/2017

	Model	Tactical Peer Group Benchmark
3-Month Return	0.88%	0.80%
YTD	4.81%	4.51%
1-Year Return	4.81%	4.51%
3-Year Return	3.37%	2.87%
5-Year Return	3.19%	2.99%
10-Year Return		
Since inception	3.43%	3.15%
Growth of 10k	\$12,381.89	\$12,168.62
Turnover (1yr)	0.00%	

Growth of a \$10,000 investment

Benchmark compositions can be found in the appendix.

Current Investments as of 12/31/2017

Investors should consider the investment objectives, risks, and charges and expenses of a fund carefully before investing. Prospectuses and, if available, the summary prospectuses, containing this and other information about the fund are available by contacting your financial consultant. Please read the prospectus and summary prospectus carefully before investing to make sure that the fund is appropriate for your goals and risk tolerance. The performance quoted reflects the reinvestment of dividends and capital gains and is net of expenses. It does not reflect the maximum sales charges, which are generally waived for investments within qualified plans. Such charges, if applied, would reduce the performance quoted. The performance information shown represents past performance and is not a guarantee of future results. The investment return and principal value of an investment will fluctuate so that the shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance information shown. For performance data current to the most recent month-end, please reference the Investment Company Contact Information section. Returns shown in *bold italic* indicates Extended performance.

Models - Factsheet: Region 10 457(b) - Moderately Conservative (RA)

Objective:

Current Model Allocations

The current model allocation is shown below. Specific investment positions may be found in the table below.

Intermediate Fixed Income	20.0%
Large-Cap Equity	20.0%
Long-Term Fixed Income	20.0%
Developed International Equity	15.0%
Short-Term Fixed Income	10.0%
Small-Cap Equity	10.0%
Emerging Market Equity	5.0%
Total:	100.0%

Risk Level

Using the model's 3 year standard deviation, the gauge below reflects, on a relative scale, the risk associated with this model.

Current Model Performance as of 12/31/2017

	Model	Tactical Peer Group Benchmark
3-Month Return	3.02%	2.67%
YTD	12.40%	12.30%
1-Year Return	12.40%	12.30%
3-Year Return	6.35%	5.78%
5-Year Return	7.12%	6.55%
10-Year Return		
Since inception	7.39%	6.67%
Growth of 10k	\$15,703.56	\$15,049.52
Turnover (1yr)	11.11%	

Growth of a \$10,000 investment

Benchmark compositions can be found in the appendix.

Current Investments as of 12/31/2017

Investors should consider the investment objectives, risks, and charges and expenses of a fund carefully before investing. Prospectuses and, if available, the summary prospectuses, containing this and other information about the fund are available by contacting your financial consultant. Please read the prospectus and summary prospectus carefully before investing to make sure that the fund is appropriate for your goals and risk tolerance. The performance quoted reflects the reinvestment of dividends and capital gains and is net of expenses. It does not reflect the maximum sales charges, which are generally waived for investments within qualified plans. Such charges, if applied, would reduce the performance quoted. The performance information shown represents past performance and is not a guarantee of future results. The investment return and principal value of an investment will fluctuate so that the shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance information shown. For performance data current to the most recent month-end, please reference the Investment Company Contact Information section. Returns shown in **bold italics** indicates Extended performance.

Appendix: Model Historical Performance Disclosure

The model historical performance data is presented for informational purposes only. All model portfolios have been designed to seek certain risk-return relationships. Historical performance data shown represents time-weighted results of the models presented.

Model performance is calculated as follows:

- The starting date for the performance history is based off of the oldest model time period in the system.
- A weighted return is calculated for each month based upon the actual model investments and allocations stored for that period.
- If manual rebalancing is selected, the model will continue to grow each month until a new period allocation is specified within the system. At that point, it will rebalance to the new allocation and repeat the process.
- If monthly, quarterly, semi-annual or annual rebalancing is selected, the model will continue to grow for the specified time period and then it will automatically re-balance to the latest period allocation specified within the system. It will continue to repeat this process.
- If an investment does not have a return for a month, the weighted return for that month is calculated excluding the investment's assets.
- The individual monthly returns are then compounded to result in the corresponding annualized returns shown in this report.

Tactical Peer Group Benchmark performance is calculated as follows:

- Each investment in the model is assigned a specific peer group. For registered investments, this is the Morningstar Category. Custom holdings are assigned a peer group by the financial consultant preparing this report.
- For each month the model has been existence, every investment is mapped to its peer group. These peer group allocations are then totaled.
- A monthly weighted return is then calculated using these peer group percentages and the corresponding median mutual fund/ETF return. (Note: If a peer group does not have a median return for a particular month, the assigned index return will be used instead.)
- The same rebalancing schedule used in the model is applied to the tactical benchmark.
- The individual monthly returns are then compounded to result in the corresponding annualized returns shown in this report.

Strategic Peer Group Benchmark performance is calculated as follows:

- If included, the strategic benchmark represents a static allocation of investment peer groups specified by the financial consultant preparing this report. Unlike the tactical benchmark, there is no direct relation to the investments in the model.
- A monthly weighted return is calculated using these peer group percentages and the corresponding median mutual fund/ETF return. (Note: If a peer group does not have a median return for a particular month, the assigned index return will be used instead.)
- The same rebalancing schedule used in the model is applied to the strategic benchmark.
- The individual monthly returns are then compounded to result in the corresponding annualized returns shown in this report.

Custom Benchmark performance is calculated as follows:

- If included, the custom benchmark represents a static allocation of one or many indices specified by the financial consultant preparing this report.
- A monthly weighted return is calculated using these index percentages and the corresponding index monthly return. (Note: If an index does not have a return for a particular month, its allocation will be excluded from the calculations.)
- The same rebalancing schedule used in the model is applied to the custom benchmark.
- The individual monthly returns are then compounded to result in the corresponding annualized returns shown in this report.

The performance of the tactical peer group benchmark, strategic peer group benchmark (if included), and custom benchmark (if included) are not an exact representation of any particular investment, as an individual investor cannot invest directly in the indices or peer group median that are used in the calculations.

The performance data does not represent actual trades of client portfolios. Performance results for clients that invested in accordance with the model portfolios will vary from the historical model performance data due to market conditions and other factors, including client objectives, investment cash flows, size and timing of mutual fund and exchange traded fund allocations, trading costs, frequency and precision of rebalancing and reconstitution, tax-management strategies, cash balances, varying custodian fees, and/or the timing of fee deductions. These and other factors may materially influence performance results and therefore actual client performance for any portfolio may be materially lower or higher than that of the model portfolios.

The model historical performance information shown includes reinvestment of dividends and capital gains, but does not include adjustments for advisory fees and sales charges. If adjusted for advisory fees and sales charges, the performance of any portfolio would be lower. When used for comparison purposes, it should be noted that the composition and variability of market indices, such as the S&P 500, an unmanaged market-value weighted index, and the composition and volatility of the models portrayed in this report may be materially different. Please refer to the Peer Group Definitions and Index Definitions for more information.

As with any investment strategy, there is potential for profit as well as the possibility of loss. Asset allocation does not ensure a profit or guarantee against a loss. Any minimum level of investment performance or the success of any portfolio or investment strategy cannot be guaranteed. Past performance is no guarantee of future results and current performance may be higher or lower than the performance shown.

Investors should consider the investment objectives, risks, and charges and expenses of a fund carefully before investing. You may contact your financial consultant for additional information on fund and portfolio results, fund prospectus and if available, the summary prospectus, and fees. Please read the prospectus and summary prospectus carefully before investing to make sure that the fund is appropriate for your goals and risk tolerance.
