Standardized Performance Disclosure (Mutual Funds and ETFs only)

Standardized Returns for the period ended 12/31/2019. Returns for periods of less than one year are not annualized. Standardized Returns assume reinvestment of dividends and capital gains. It depicts performance without adjusting for the effects of taxation, but are adjusted to reflect sales charges and ongoing fund expenses. If adjusted for taxation, the performance quoted would be significantly reduced. The sales charge used in the calculation was obtained from the fund's most recent prospectus and/or shareholder report available to Morningstar.

Investors should consider the investment objectives, risks, and charges and expenses of a fund carefully before investing. Prospectuses and, if available, the summary prospectuses, containing this and other information about the fund are available by contacting your financial consultant. Please read the prospectus and summary prospectus carefully before investing to make sure that the fund is appropriate for your goals and risk tolerance. **The performance information shown represents past performance and is not a guarantee of future results.** The investment return and principal value of an investment will fluctuate so that the shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance information shown. For performance data current to the most recent month-end, please reference the Investment Company Contact Information section.

ETF's trading on a secondary market may trade at, above, or below their net asset value ('NAV'). The market return ('MKT') is based on the price of the ETF as of the close of trading on the last business day at month-end.

Investment Snapshot

The Fi360 Fiduciary Score is a peer percentile ranking of an investment against a set of quantitative due diligence criteria selected to reflect prudent fiduciary management. The criteria include total returns, risk-adjusted returns, expenses, and other portfolio statistics. Investments are ranked according to their ability to meet due diligence criteria every month. The rank becomes the Fi360 Fiduciary Score. The Fi360 Fiduciary Score Average is a one-, three-, five- or ten-year rolling average of an investment's Fi360 Fiduciary Score. The Fi360 Fiduciary Score represents a suggested course of action and is not intended, nor should it be used, as the sole source of information for reaching an investment decision. Visit the Glossary or fi360.com/fi360-Fiduciary-Score for more information.

Investors should consider the investment objectives, risks, and charges and expenses of a fund carefully before investing. Prospectuses and, if available, the summary prospectuses, containing this and other information about the fund are available by contacting your financial consultant. Please read the prospectus and summary prospectus carefully before investing to make sure that the fund is appropriate for your goals and risk tolerance. The performance quoted reflects the reinvestment of dividends and capital gains and is net of expenses. It does not reflect the maximum sales charges, which are generally waived for investments within qualified plans. Such charges, if applied, would reduce the performance quoted. **The performance information shown represents past performance and is not a guarantee of future results.** The investment return and principal value of an investment will fluctuate so that the shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance information shown. For performance data current to the most recent month-end, please reference the Investment Company Contact Information section.

Models - Summary

Model summary statistics are reported below. The performance quoted reflects the reinvestment of dividends and capital gains and is net of expenses. It does not reflect the maximum sales charges, which are generally waived for investments within qualified plans. Such charges, if applied, would reduce the performance quoted. **The performance information shown represents past performance and is not a guarantee of future results. The investment return and principal value of an investment will fluctuate so that the shares, when redeemed, may be worth more or less than their original cost.**

Historical model performance is calculated using the historical investments and allocations specified along with the rebalancing method that was selected. If included, the hypothetical performance (Hypo.) is for illustrative purposes only and may not reflect the actual performance or volatility that would have been experienced. It utilizes the current model allocations and does not take into account any historical investment or allocation changes. 1yr Model turnover is approximated using the following formula: the lesser of investments added during the last year and investments removed during the last year is divided by the average number of investments held over that period. Please view the Appendix for additional disclosures.

Model Name	Weighted Expense Ratio	Turnover			Standard Deviation	YTD	Annualized Total Return				Return since inception
		1-Year	3-Year	5-Year			1-Year	3-Year	5-Year	10-Year
